

Supplementary Table 5. Multivariable adjusted odds ratios (ORs) of covariates included in the backward elimination regression analyses

Covariates	sICAS progression	<i>P</i>
	OR (95% CI)	
Age (1-yr difference)	0.96 (0.93–0.98)	0.003
Qualifying stroke severity	0.87 (0.75–1.01)	0.071

sICAS, symptomatic intracranial atherosclerotic stenosis; CI, confidence interval.
