

Supplementary Table 1. Clinical respiratory infection (according to PISCES probable criteria) rate and any low respiratory tract infection on THRCT regarding intravenous fibrinolysis and mechanical thrombectomy

Variable	Yes	No	<i>P</i>
Clinical respiratory infection (PISCES probable)			
Intravenous fibrinolysis	5 (19.2)	21 (80.7)	0.95
Mechanical thrombectomy	2 (15.3)	11 (84.6)	0.65
Any low respiratory tract infection on THRCT			
Intravenous fibrinolysis	6 (23.1)	20 (76.9)	0.44
Mechanical thrombectomy	2 (15.3)	11 (84.6)	0.65

Values are presented as number (%).

PISCES, Pneumonia in Stroke Consensus; THRCT, thorax high resolution computed tomography.
