

Supplementary Table 2. Etiologic mechanisms of stroke in 129 patients with a determined etiology

Mechanism	Etiology
Cardioembolism	51
Atrial fibrillation	31
Patent foramen ovale (with venous thrombosis)	7
Akinetic left ventricular segment	3
Hypokinetic left ventricular segment	3
Valvular heart disease (prosthetic valve replacement)	2
Cardiac thrombus	2
Atrial septal aneurysm	1
Status of inserted pacemaker (sick sinus syndrome)	1
Infective endocarditis	1
Large artery atherosclerosis	46
Small artery disease	10
Other determined etiologies	3
Two or more causes	19
Large artery atherosclerosis+cardioembolism	14
Atrial fibrillation	11
Atrial flutter	1
Prosthetic valve replacement	1
Spontaneous echo contrast	1
Large artery atherosclerosis+small artery disease	3
Cardioembolism+small artery disease	2
Atrial fibrillation	2
