

Supplementary Figure 8. Association of apolipoproteins with intracerebral hemorrhage (ICH) (China, India, and all other regions). Restricted cubic spline plot of association of (A) apoB and (B) apoA1 (X-axis) with ischemic stroke and ICH. Spline curves truncated at highest and lowest 2% of values. Light blue shading denotes 95% confidence interval. All splines adjusted for age, sex, geographic region, and potential confounders (smoking, diabetes mellitus, physical activity, diet, psychosocial factors, waist-to-hip ratio, and alcohol intake).
