

Supplementary Figure 2. Comparisons of amyloid PET uptake in the frontal cortex and PCC. Box plots showing absolute amyloid burden in (A) frontal cortex, (B) PCC, and relative amyloid burden (ROI/whole cortex ratio) in (C) frontal cortex, (D) PCC. SUVR, standardized uptake value ratio; AD, Alzheimer's disease; CAA, cerebral amyloid angiopathy; PCC, posterior cingulate cortex; PET, positron emission tomography; ROI, region of interest. $*P < 0.05$.
